Making the Most of Your Massage

How to Prolong the Benefits of Bodywork

Barbara Hey

A massage works in wonderful ways, easing stress and pain, calming the nervous system, increasing circulation, loosening tight muscles, stimulating internal organs, and enhancing skin. The multiplicity of physiological responses sends a simple, clear message to the mind: Massage feels good. Of course, you want to hold on to that just-had-a-massage feeling -- total body relaxation, muscles relaxed and at ease, and fluid movement restored -- for as long as possible.

But how long that bliss lasts depends on the state of your body. If you're suffering from chronic pain or recovering from injury, then it may take more sessions and perhaps different

Massage Frequency

How often you receive massage depends on why you're seeking massage. In dealing with the general tension of everyday commutes, computer work, and time demands, a monthly massage may be enough to sustain you. On the other hand, if you're seeking massage for chronic pain, you may need regular treatments every week or two. Or if you're addressing an acute injury or dealing with high levels of stress, you may need more frequent sessions. Your situation will dictate the optimum time between treatments, and your practitioner will work with you to determine the best course of action.

The more often you receive massage, the more therapeutic it becomes.

modalities before optimal health is restored.

If massage is part of your regular health regimen, then it's more likely the effects will endure. In other words, the effects of massage are cumulative, like any healthy habit. The more often you get a massage, the greater and longer-lasting the benefits.

"You need to consider how you felt before the session and how you felt after, and then look at how long you maintain that," says Pieter Sommen, the chair of the eastern department in the Swedish Institute School of Massage Therapy in New York.

In general, experts say "regular" is preferable, but how regular depends on your situation. While daily massage would be delightful, practical considerations such as cost, time, and physical need likely determine the frequency of treatments. "It's best to maintain a schedule," says Eeris Kallil, CMT, a shiatsu instructor at the Boulder College of Massage Therapy in Colorado. "That way the body becomes conditioned and prepared for session at specific intervals."

Maintenance

Whether you get a massage weekly, monthly, or just every once in a while, the following habits can maximize and extend the afterglow of treatment.

WATER

One bit of advice you'll hear over and over again is to drink plenty of water after a massage. Bodywork -- no matter the particular modality -- releases toxins, such as lactic acid and carbonic acid, that need to be flushed from the body. Massage also promotes circulation, increasing blood flow and oxygen and stimulating the lymphatic system, which helps rid the body of pathogens. After-massage hydration supports these functions, helping to eliminate released impurities, sooner rather than later.

STRETCHING

Another helpful habit is stretching between massages to maintain joint mobility, prevent muscles from tightening up again, and keeping the life energy flowing. This may mean doing yoga or whatever specific or full-body stretches suggested by your practitioner. After a shiatsu session, for example, your practitioner may recommend "makko-ho" stretches, a series of six exercises designed to keep energy circulating. "This series of stretches take anywhere from 5 to 10 minutes a day, but really help keep the chi flowing through the body," says Kallil.

EXERCISE

Working out can also help maintain the benefits of massage, and this habit should be continually cultivated. However, if you're receiving massage therapy to help speed muscle strain recovery, you may need to ease up on

the exercise for a while and give the body time to heal -- particularly if you're recovering from a strenuous body-pummeling training regimen. "You don't want to over-work your body," says Kallil. That is, if running is taking a toll, try something more gentle and meditative such as swimming, walking, or tai chi.

BODY AWARENESS

After a massage, respect how your body feels. If your body seems to ask for rest, give in to that demand. This may mean backing off the to-do list, taking it easy, moving slower, and perhaps doing less for a while. And don't allow yourself to get fatigued because it will undermine the effects of massage. Get sufficient sleep to allow the body to absorb the effects and regain vitality.

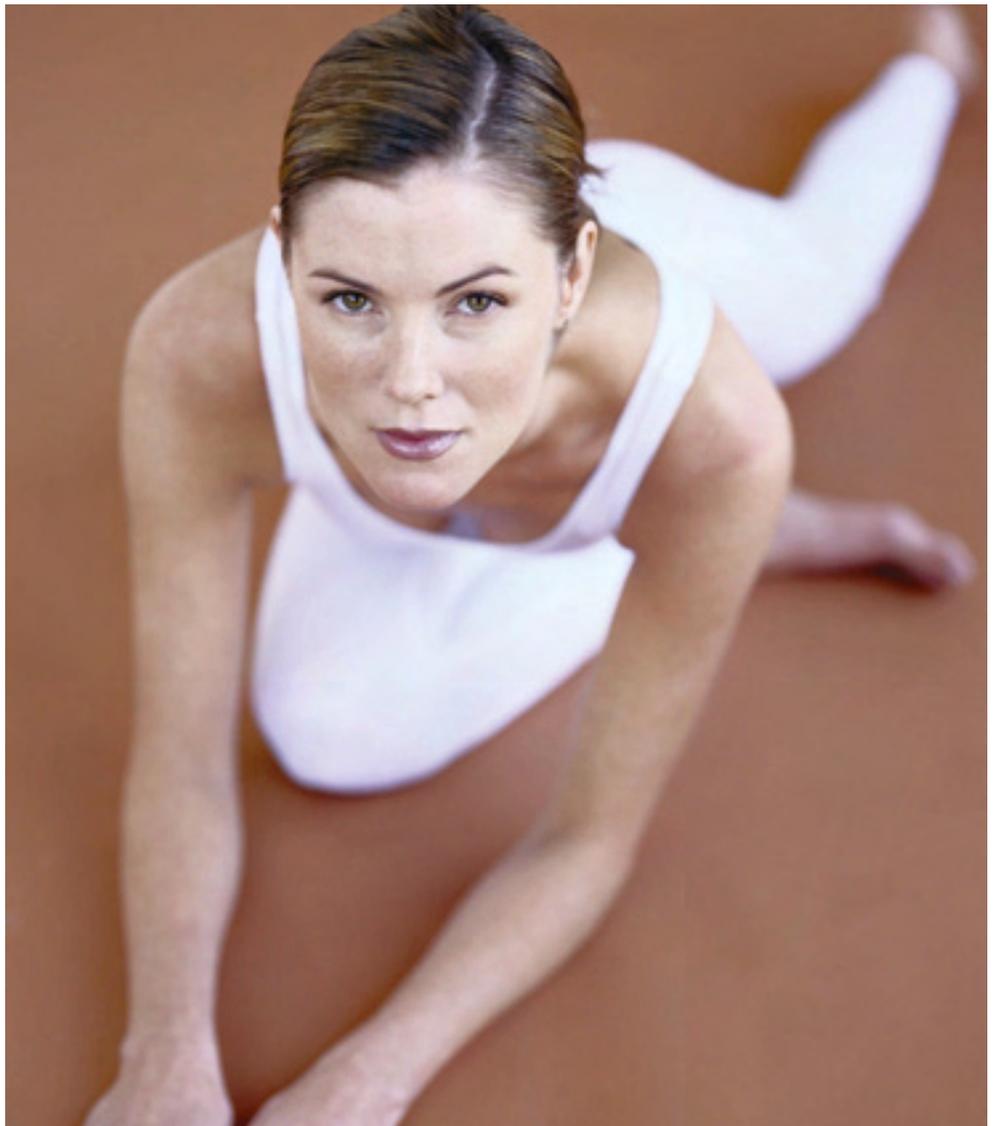

DIET

Finally, since you've just rid the body of

toxins, support the body's renewed state by adhering to a healthy diet rich in fruits and vegetables, which will continue the detoxification process. Lay off the espresso and all adrenaline-challenges for a time -- which would short-circuit relaxation anyway -- and enjoy the calm.

The benefits of massage are many, including: increasing circulation, allowing the body to pump more oxygen and nutrients throughout the body; stimulating lymph flow and boosting immunity; relaxing overused or tight muscles; increasing joint mobility and range of motion; reducing recovery time after strenuous workouts or surgery; and relieving back pain and migraines, just to name a few.

By opting for a few lifestyle choices, you can extend these benefits and get the most out of your massage.

Stretching between massages helps maintain relaxed muscles, joint mobility, and energy flow.

Nature's Nutritional Wonder

Cruciferous Vegetables

Cruciferous vegetables are powerful foods that can help prevent many forms of cancer, reduce existing cancer tumors, and aid in the prevention of heart disease. Broccoli, cabbage, cauliflower, arugula, kale, and Brussels sprouts all contain isothiocyanates--a group of chemicals that break down carcinogens in the body, helping to metabolize toxins. Studies show that people who eat two to three servings of cruciferous vegetables each week lower their risk of breast cancer, colon cancer, and lung cancer. A National Cancer Institute study found that eating three helpings of crucifers a week dropped prostate cancer risk by 50 percent. The powerful chemicals in these veggies also reduce homocysteine levels, a known precursor to heart disease.

Cruciferous vegetables are low in calories and high in fiber and the chromium found in these foods helps regulate blood sugar and insulin function, key factors in keeping diabetes at bay. Even with all the benefits that crucifers provide, many people refuse to

eat them because of their strong taste. But a little creativity can go a long way in making these wonderful foods palatable: try cream of broccoli soup, cauliflower au gratin, stuffed cabbage, or the recipe below--the possibilities are endless.

BRUSSELS SPROUTS FOR THE MEAT-AND-POTATOES EATER

1 pound fresh Brussels sprouts, washed, stems trimmed, and outer leaves removed
1 tablespoon extra virgin olive oil
2 tablespoons unsalted butter
3 tablespoons cider vinegar
1/4 cup grated Parmesan cheese
Salt and pepper, to taste

Thinly slice Brussels sprouts, either in a food processor fitted with a slicing blade, or by hand. Heat a heavy, nonstick skillet. Add olive oil and butter, swirling the pan so that the butter melts. Saute sliced Brussels sprouts for 5 minutes. Add cider vinegar and grated Parmesan, stirring briefly to incorporate. Add salt and freshly ground black pepper to taste. Serves four--who will all be healthier for it!

Cruciferous veggies help ward off disease.

Massage for Seniors

Bodywork Improves Quality of Life

Almost 35 million Americans are age 65 or older, and about 2,000 more reach this age every day. As the U.S. demographic shifts to an older population, it's important to find ways of helping our elders maintain their health and vitality. Massage for seniors is gaining importance as an alternative therapy to increase quality of life, and many massage therapists are getting special training to better serve this growing population.

SENIORS' SPECIAL NEEDS

While similar in technique to other forms of massage, geriatric massage considers the special needs of the elderly. The specialty trained practitioner knows about positioning for greatest comfort and will often have

the client rest in the same position for the entire massage. Mobility challenges may dictate the massage be done in a bed or wheelchair. The therapist may also work both sides of the body at the same time to enhance body awareness, or only work hands and feet, if the client prefers. Sessions may be limited to 30 to 45 minutes, as older clients often do better with shorter, more frequent, massages.

The geriatric massage therapist is aware of health issues associated with aging and how to safely work with this type of client and with associated physicians. Consequently, the practitioner is able to individualize the massage service based on the client's health, mobility, and comfort level.

BENEFITS OF GERIATRIC MASSAGE

A recent study conducted at the Weaver's Tale Retreat Center in Oregon looked at the effects of massage for elderly clients. The results of the two-year study showed that participants experienced a decrease in breathing rate of 50 percent and an improvement in range of motion, posture, body awareness, skin color, and muscle tone. Furthermore, it is well documented that caring touch benefits emotional well-being in seniors -- a population at greater risk of suffering from depression.

Massage therapy can add to the quality of a senior's life, both physically and emotionally. Consider booking a session for someone you love, and make a difference in their life.

'Tis the season to be sneezin'!

Here we are again Falling into Winter. And it appears as if our crazy Wisconsin weather is going to be rough this season. Even though it is cold out, remember to drink plenty of water. This will help guard against dry skin. And our lack of sun gets some of us into the "blues" mode. So make the most of your times with friends, laugh hard, count your many blessings, and share your smile with those who may not have one of their own- it's contagious! And we would all rather catch a true smile than a cold!!

Have a great and safe season!

Love, Hugs, and Peace,
